

HP OpenCall Developer Consulting

Service brief

HP Developer Consulting provides you with access to HP engineers with extensive experience in telecom application development. This expertise saves you time and gives you greater confidence in the quality of your applications.

Let dedicated consultants assist your developers

In today's challenging environment, telecom application developers must deliver high quality applications and services in an ever-decreasing time to market. By working closely with you throughout the development phase of your application's lifecycle, HP OpenCall Developer Consulting can help you not only accelerate delivery but also increase the security of your deployment and enable optimized return on investment (ROI).

HP OpenCall Developer Consulting is tailored to meet your specific development needs. It helps you build on the benefits of HP OpenCall Developer Training and HP OpenCall Developer Assistance.

HP Developer Consulting provides you with access to a dedicated team of engineers with extensive experience in telecom application development. It supports the entire range of HP OpenCall platforms.

Access to HP expertise helps you improve the quality of your application and verify that it is designed, developed and ready to deploy with first-rate optimization for HP OpenCall platforms. In addition, HP Developer Consulting helps you save time during the development phase.

Leverage HP expertise for your project

HP OpenCall Developer Consulting offers your developers extensive experience from HP in the following fields of expertise.

Fast prototyping

Fast prototyping for proof of concept purposes enhances your pre-sales and project start-up opportunities by demonstrating:

- Your team's ability to quickly develop next-generation telecom services, such as 3G mobile prepaid service or multi-media interactive services
- Your application's ability to interconnect to a specific type of network equipment
- Your application's ability to attain the performance targets you defined

Our experts can work with you to rapidly build prototype applications, or we can build them for you.

Customized developer support for accelerated setup

Having completed HP OpenCall Developer Training, your team will want to start developing applications as soon as possible. To give your developers the best foundation for this work, HP OpenCall Developer Consulting offers personalized guidance that helps your team apply and adapt what you learned during the training to the application you are developing. Tailored to suit your needs, this service covers a wide range of topics, such as application design, specialized training and code review, as well as performance optimization for your development platform. Our experts can work with you either onsite or remotely.

Application tuning

This application-centric consulting service focuses on helping you optimize your application prior to deployment. HP engineers can help you fine tune your application to attain more effective performance and stability. This service is particularly useful should you need to conduct any industry-recognized benchmarks. The HP global range of test and validation centers can be put at your disposal.

Migration support

Migration support helps you benefit from the latest HP OpenCall features. As part of the continual drive to improve its range of HP OpenCall platforms, HP enables transparent migration from current to newer platforms. This service also supports the migration from platforms other than HP OpenCall. With HP OpenCall Developer Consulting, HP engineers can build customized workshops to evaluate the impact and benefits of the platform's new features with regard to your application.

At HP, we realize that every project is different. HP OpenCall Developer Consulting can therefore provide a wide range of services to assist you with your application development and help you best prepare for deployment. If you have a precise need or aim, please contact your local HP sales representative.

The HP OpenCall Developer Consulting advantage

When time is critical, you want your team to concentrate on its core competence—application development—and not the platform. By providing access to expertise in telecom application development, HP OpenCall Developer Consulting helps you get the most out of the HP OpenCall platform.

Ultimately HP OpenCall Developer Consulting accelerates time-to-market, improves quality and optimizes ROI for your application.

How to order

To order this service, please contact your local HP sales representative and specify the following product number: J7158A—HP OpenCall Developer Consulting.

About HP OpenCall

HP OpenCall provides comprehensive, carrier-grade platforms for the development and deployment of next generation voice, data and converged services. With more than 1,600 installations in 100 countries worldwide, HP OpenCall is a world leader in SS7 software stacks and the number one software for Service Control Points and Short Message Service Centers. In addition to the superior combination of HP hardware and software, HP OpenCall enables the communication industry to harness the convergence of the Internet with the world of voice communication.
