

HP Telecom Software ACTIVation Service

For HP's portfolio of telecom solutions

Data sheet

Help ensure quick and accurate deployment of HP telecom platforms. With the HP Telecom Software ACTIVation Service, HP telecom experts help you get the job done right the first time, every time. The service gives you the confidence that you have a highly available and supportable telecom platform.

Service description

HP telecom experts work with you side-by-side to align, configure, test, install and validate your telecom platform into your environment. The onsite ACTIVation Service provides swift and efficient deployment of your telecom solution into the existing network adapting to specific configurations.

Key benefits

- Help ensure speedy operational start-up and a secure production environment with an optimized best-in-class setup
- Speed time to market and revenue generation
- Help ensure deployment is done right the first time, every time, in a time-tested manner

The ACTIVation Service is led by an HP senior consultant with experience and expertise in telecommunications and IT environments.

Feature	Advantage	Benefit

<ul style="list-style-type: none"> Insurance policy 	<ul style="list-style-type: none"> Done right the first time Manage costs 	<ul style="list-style-type: none"> Peace of mind Save money

Core service deliverables

HP provides the ACTIVation Service for our broad portfolio of telecom solutions. For additional deliverables for your specific platform’s activation, see HP’s detailed statements of work.

- 1. Align:** In collaboration with your team, an HP expert will review the customer’s platform configuration, identify potential configuration problems with a resolution path and work out a schedule and checklist of activities.
- 2. Configure:** Conduct a basic configuration. Ensure the system is up and running and has the basic configuration collaboratively agreed to in the align phase. This includes some basic and general customization of files and configuration of key elements to help ensure the solution meets your specific environment.
- 3. Test:** By working through a documented and agreed-to test plan, help ensure the functionality of key elements of your solution. Test and validate the operation of your specified configuration. Where appropriate, load test data models and services.
- 4. Install:** Install the latest version of the application software as required and all the software updates needed by the solution. As appropriate, install any required patches for the operating system and networking components as well.
- 5. Validate:** Start platform up and validate processes are up and running. Verify basic functionality of key elements and components. Demonstrate to your team members that they have a fully functional and robust platform.

Expert profile

The ACTIVation Service will be led onsite by an HP senior consultant with a background in telecommunications and IT environments, expertise in intelligent networks and experience installing, maintaining and supporting HP telecom platforms at customer sites.
